TRADIMO NANODIPLOMA

Our mission is to bring accessible, affordable, engaging, and highly effective financial education to the world. We believe that financial education is a cornerstone of society, and we seek to empower our students to advance their education, careers and financial independence.

TRADIMO

T E R M S

TERM 01

The basics of stock market and investing

TERM 02

Picking stocks with the right mindset

TERM 03

Become a Warren Buffett 2.0

INTRODUCTION

Become a Successful Investor

When we are talking about investors, we are relating to stocks in the first place. Nearly everybody knows Warren Buffett – known as the prodigy stock investing – and many stock traders and investors are trying to be like him. However, you do not have to be a multi-millionaire to invest successfully. With smart investments, you can earn yourself a very attractive side income, manage your pension fund or simply improve your daily life.

With completing this degree, you will have the knowledge to invest in stocks in your own way for the rest of your life. You will learn everything you need to know about buying and selling stocks – in a fun and exciting learning process! From checking company reports, reading about economic expectations through to analysing charts: you will get to know the different methods to determine whether the shares of a company will go up or down.

Tradimo's Investor Nanodiploma is divided up into three separate terms, designed to provide you the necessary knowledge and practical experience to become a successful investor.

While you will be learning about general trading knowledge; fundamental and technical analysis; trading psychology and concrete trading strategies, the difficulty will increase with each term, therefore providing you a deeper understanding of how everything fits together.

Additionally you can contact and ask us questions at any time during the entire duration of this degree. By giving you personal feedback on all of your projects, we will ensure that you have understood everything perfectly.

TERM 01

The basics of stock market & investing

In term 1 you'll master the basic elements of trading and the stock market through an easy-to-understand introduction. You'll learn more about stocks and important lessons on money management and technical analysis.

Requirement to finish TERM 1:

Term 1 is completed by finishing four courses and three projects, which require you to apply your newly gained knowledge practically.

Your courses are:

- Learn the Basics of Stock Trading
- Don't Go Broke - Protect Your Capital
- Technical Analysis Course
- Support and Resistance Trading

Your projects are:

PROJECT

Choose a broker and open a demo account

PROJECT

Take the current daily chart of Apple and draw all important support and resistance line for the last 3 years

PROJECT

Open a live account

TERM 02

Picking stocks with the right mindset

In term 2 you will learn how to create a stock portfolio and what an Exchange-Traded Fund (ETF) is. Investors often keep their stocks over a long period of time, because they believe that downs will be dominated by ups in the long run.

However, stable companies can experience extreme down trends too; for such times you need to have a good mindset. Therefore, term 2 will deal with your psychological foundation.

Requirement to finish TERM 2:

Term 2 is completed by finishing four courses and two projects, which require you to apply your newly gained knowledge practically.

Your courses are:

- Advanced stock trading
- How to Become a Trader and Investor
- Take Control of Your Emotions
- Psychology Pattern

Your projects are:

PROJECT

Create your own stock portfolio on your demo account

PROJECT

Find an ETF for the S&P500, DAX, Gold and the oil industry.

TERM 03

Become a Warren Buffett 2.0

Term 3 provides you a deeper understanding of companies' operating numbers. You will learn to avoid psychological mistakes that are occurring in the early stages of investing careers. In addition, we will teach you a better finance management to achieve long-term success.

Requirement to finish TERM 3:

Term 3 is completed by finishing two courses and one projects, which require you to apply your newly gained knowledge practically. After term 3 you can call yourself an advanced investor.

Your courses are:

- Trading stocks with operating numbers
- Stock Market Investing Strategies

Your final project is:

PROJECT

Look for two earning reports from two companies in the same industry and compare the figures to find the better company
